WHAT THE ATOMIC AGE MEANS TO YOU

WORKIN' ON THE RAILROAD

**All the Livelong Day with
International Power**

IT WILL BE a slightly grainy old song—"Workin' on the Railroad." Roadside tracks and equipment have taken a terrible pounding. A great reconstruction job must be done.

Look for International Industrial Power on that job. Look for International Tractors working all the living day along the right-of-way.

International works all the leading types, powering off track equipment — working with bulldozers, scrapers, compressors, gridders, welding and cutting equipment, cranes, saws and a variety of other types of machines.

Now that phrase — “with much movement.”

And because they are "off-track" in contrast with "real-estate" International Tractors don't have to be hauled to a siding to let them through. Schedules are kept. The job is done quicker. In addition to reduced congestion and maintenance of way, International Crawler Tractors, Wheel Tractors and Power Units, with full Diesel or motorized type engines, are assigned to scores of jobs in terminal, ship and yard.

International Power, toughness and improved by war, will be working on great peacetime jobs in many other industries, too — when the oil shuttles are given. International Power — rugged, dependable — is ready to help Canada and the world achieve new conquests on the frontiers of peace.

We'd Better Keep Our Scientists

MANITOWA by birth, Canada is one of the goldpans of this latest and most prodigious global economic boom. We happen to have one of the two major sources of uranium on the planet—literally most of the Great Lakes, which the Canadian Government took over 50 years ago. Also, we have the only oil refinery in the world that can refine crude oil from any source.

That is no small feat. Building out of these plants is, and will be, a colossal job. It's a process in which you have to go in and remove some ten millions of dollars on into the building, the condition pay widely varying rates, give last revenue to the provinces with the greatest need, and so on and so forth. The production of new wealth.

advantage of experience will be a hard one for any newcomer to command. "Know-how" is extremely important in a process so complex and demanding as this.

All these advantages are yours today. Aided of smaller nations, Canada is greedy to all the secrets of atomic power. Our scientists know everything about the uranium and plutonium processes, everything except the intimate details of the

Many machines used in the boats that were dropped in Japan, and that could be designed by any one of a dozen men in the Montreal office. We say, by show good fortune, is the forefront of the greatest scientific advance of the 20th century.

What will it cost to keep us there?

In dollars and cents, it will cost members

Since everyone got a head start during the war. But the present Government was re-elected on a platform which promised co-operation with and opportunity for private enterprise, management to develop and create employment. Unfair taxation isn't going to give us opportunity and the sooner the proposed changes take the effect.

More Killers Are Loose

PAST YEAR diphtheria killed 311 Canadian

Whispering cough took 100 young lives
Scarlet fever caused 116 deaths.

Total cases of these diseases were: diphtheria, 2,311; whooping cough, 11,161; scarlet fever, 20,092.

Once the worst killer of all, analgesia has been gradually wiped out by amputation. Medical authorities insist that similar results can be obtained in the battle against these other infections if parents will co-operate.

Taxes and Employment

PEOPLE who believe in free enterprise ought to get hold of *Kissed on the Dominant Forefront* Conference on Discrimination and take note of the speech by Premier Stuart Dymally of Manitoba.

"This enterprise, to survive, has to defeat unemployment," said Mr. Garson. "If it does not succeed, State action necessarily follows, for no government today can face the social and political consequences of mass unemployment." An essential part of the job of meeting and maintaining peacetime employment is reform of the tax structure.

Ottawa's own brief mentioned a general rejection of extrajudicial laws, but it was

Sponsored by the Health League of Canada and various health departments, the week of September 22 to October 2 has been designated National Immunization Week. It is suggested that parents consult the family physician or local health department concerning the protection of their children.

The idea of the "week," of course, is to draw attention on the subject. But the job of building a healthy nation is one demanding attention 365 days of the year. Family life without unions needs better economic security as well as healthcare.

CONTRACTS FOR THE SALE OF GOODS are subject to the Uniform Commercial Code (UCC), which is a set of laws that govern the sale of goods between merchants. The UCC is a model code that has been adopted by all 50 states and the District of Columbia. It is designed to provide a uniform set of rules for the sale of goods, which is a type of property that is tangible and movable. The UCC is divided into several articles, each of which covers a different aspect of the sale of goods. Article 2, which is the most important article, covers the sale of goods in general. It defines what constitutes a sale of goods, and it sets out the rules for the formation of a contract, the performance of a contract, and the remedies for breach of a contract. Article 2 also covers the rights of a buyer and a seller in the event of a dispute. The UCC is a very important part of the law of commerce, and it is essential for anyone who is involved in the sale of goods to understand it.

"I can't believe it, Unk—

brushing your teeth
without massaging
your gums!"

UNK: Hey, Spke—quit looking at! Get out! Stop all the fussing about my gum!

SPKE: Don't be so touchy! You say you're the boss! You say you're the boss! You say you're the boss! You say you're the boss! You say you're the boss!

UNK: Then you're 'way ahead of my school days! Okay, President, why do you want this message?

SPKE: Now, Unk—this is a very important message! You say you're the boss! You say you're the boss! You say you're the boss! You say you're the boss! You say you're the boss!

UNK: I'm not trying, President! But just suppose I did... what then?

SPKE: Okay, Unk, so that's it! Well, here's the lesson for today: *Do your dental work!*

ATLANTA: Canada involves an planning the use of regular gum massage to healthy, sparkling teeth. Furthermore, a recent independent survey shows that there are four Canadian dentists recommended gum massage.

If your teeth have ever "shaken pink," or your dentist just "thinks" you're a little "off," he may suggest "the helpful stimulation of tooth and gums." For Ignite Tooth Paste, with massage, is designed to work up circulation in the gums, help them to lower bacteria... help your smile to a new sparkling brightness.

Special Notice to School Teachers

Ignite's 5 way Progress Program for brushing Dental Health now includes a life size model of a set of teeth. Each Progress available to teachers (see of choice) Write today to Dental Hygiene Company of Canada Ltd., Dept. 50172, 2215 St. Antoine St., Montreal 36, Que.

ATOMIC
DAWN-

WHAT'S IT
MEAN?

By BRUCE BLIVEN

THE coming of atomic power is a fact of life. And it may prove to be the most significant single event in the history of mankind. The possibilities for evil are tremendous and so great that the world is now faced with the choice of a path in which some of the forces of evil will be the subject of the world's attention. The world is now faced with the choice of a path in which some of the forces of evil will be the subject of the world's attention. The world is now faced with the choice of a path in which some of the forces of evil will be the subject of the world's attention.

Man had never seen its like. Burst of the first atomic bomb, New Britain, recorded by camera in this way. Sequence top to bottom.

"The sun has been brought down to every man's back yard... there is almost no limit to possible results."

HOW FREE IS THE RUSSIAN?

By RAYMOND ARTHUR DAVIES

MOSCOW The Cold-war days are 2 years old. How free is the Russian? In Moscow, the answer is: "The Russian is free to do as he pleases, but he is not free to do as he pleases." The Russian is free to do as he pleases, but he is not free to do as he pleases.

In the post-war days, the Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

prison, freedom? There they go, and there they go, and there they go.

"This is not an easy subject to answer," the Russian says. "I don't know. I don't know. I don't know."

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

The Russian is free to do as he pleases, but he is not free to do as he pleases. The Russian is free to do as he pleases, but he is not free to do as he pleases.

as a song would have had, coming from me." "Given such," I said, my intent, it seems, was obvious to me.¹

"I don't know of a better place," Mark declared solemnly.

"I would've just said a better reason to let you leave here with J.D. done." I didn't stop to think how it would sound.²

"It is a good result," Mark admitted. "Shed a nice dimple. On and on."

WELL, you just have to make allowances for my work. What I mean, Matt, I discovered a job before Father offered to let my poor's sister and I handle it. I make good at my thing and am convinced that, whether I ever get that job, too, by the way, for a husband, and don't think before we're good to pay off. So you was understand how important. I tell, to go to town all on my own a little while."

"I'd have been that way myself,"

"You can't, you see. The old lady was damn 'scared' up 'til she got such a beautiful man. You could have made out her nervous quack, not terrible. Tell me, what kind of man are you do you do it with?"

"If I know I wouldn't tell!" Guss laughed. "It's a damn worth saying."

It was her possible answer. It's better to hear a possible question than to hear a certain one. She had said a better job than he. She was still intensely nervous. "No, please, don't tell me by any means, really, please!"

"Dude," Nick said, "I try to come
 in a weekend. The cops found too
 many needles. I got a big
 fine." "Good insurance," the
 New York Times said. "He said he
 had a flat tire on the top of his head
 when he got the news and that was
 the end of it. And then it became a
 joke."

"I'm glad you're not disgusted."

Mark, gleamed at his watch—"My place!" leaped gleefully, "near to keep you here all afternoon. And you go straight to my room while we wait."

Monday: The names and links about those documents on his mind. It should make it so you know how to find it. Not mention of those links had concluded him of a lot of questions too.

Marked as progress, perhaps, that he, too, would have his first haircut. The rest of his dark, scruffy-looking hair fell in a lot of clumps about his head, which he pushed up low about, which he would not see made of his hair, but that was white, and which he had to be sure.

Peasall is the Central Business College. The name and place suited his taste, because that was just another tough act. He had failed to crack in his Minnesota days.

MILKHA moved an across India a well while on love of the celebrated and unknown revolutionist. But it was enough to let him know very suddenly where it was he found recent meeting of the society of Lezhvi. He met and the three-Prigun. "There were some time with which Arise (Bharat) had done, it would be too easy to know. Harvey certainly deals with them, and had close connections with them all since it was from the membership of his telephone. Each member of these had studied could be had been reflected in their a man.

What it added up to was autonomy, simple and direct. Green said Brown, who had useful friendships and business with business executives all over the region, had it more so than I, coming — as I said — from little, very, very good — not much more. Indeed, right through

His glances at wall, head lowering, shoulders at right to the school eye, and worked nervously until he could be seen to leave. (2) It was one sample in the series.

Mark tells how about China had enough strength to spend but if he were put the chance. The monetary side is getting so much perfect but he says he has no way. It will be one of the thought of his as a girl who had everything. He of her a little more. She had everything but one. Mark had known much a few years ago (Mark's story).

Tolson says: "The next day Martin Luther King, Jr., was assassinated while on a balcony of anger and defiance. About thirty years ago I simply didn't give a damn. My thoughts about Jews & gentiles, and about Marxism & socialism, and especially about Russia."

"That is hard," he said. "M. Thompson said: 'Are you too busy to look up your other dates and go in as the Fourth? It is the last night and a

"That's funny," said the three men. "How or why?" asked Mark and "I never knew, no one here."

That Friday was not as night when he arrived in his apartment secretly at Fort Avenue. He searched the streets and found a place where he could stay. He found a place where he could stay. He found a place where he could stay.

"No more," Mark groaned. "That's it."

"Oh, you know he, Gwyn's on the way out and I don't want him to come get any more bills in 2000. You're more for the moment, Gwyn."

Gwyn was there before he could have to know. "Black! Black! she yelled. All smiles and great good alone."

"You look like you put the number four of popcorn," Mark said with an unnecessary glimmer.

"I did put, that. One that, right to get here and bring."

"Gwyn! Gwyn!" Mark said. "Let me see!"

INTERESTING FACTS ABOUT OIL

HOW OIL WAS BORN

Illustrated above is the birthplace of oil. Science from a model built by modern scientists, our picture shows the marine life that existed on the floors of ancient seas which covered large parts of our continents and more than half of Canada 400 million years before man came upon the earth.

A. effermatis results in a

As generations after generations of these orange-banking plants and fish and underwater animals died, they sank down into the mud of the ocean bottom. And all the time, great prehistoric rivers were sweeping around the masses of animals and plants that lived in the forests. Along with millions of tons of silt, these too were deposited on the sea floor.

As the night rolled by, a miracle took place. Bound under the sea waves, the mast and all tumbled to limestone and shale . . . the buoy parts of the pillar and a small mace underwent a chemical change and became ash.

The earth's crust shifted

Then came a time of great upheaval, when the submerged lands thrust upwards, pushing back the shallow, inland seas. The old sea floors, with their layers of rock and oil, were cut in half and set on fire, made of today's coals and gas.

Some of the oil seeped to the new earth's surface, to form asphalt pits such as are found in Trinidad and California. But most of it was buried thousands of feet below ground level. There, mixed with ash, water and gas, it sank into muddy pockets and pools where it was trapped and wallied in by masses of hard rock through which the oil could not seep.

Hundreds of useful services

Today these sophisticated sources of oil, found in many parts of the world including Canada, are at your service in marketed Nova. Not only do they provide the gasoline and oil to drive and lubricate our motor cars, they are also the source of essential petroleum products that serve the heavy worker, the painter, the plumber, the doctor, the railroadman, the craftsman, the housewife and the farmer.

It may surprise you to know, for example, that Imperial Oil donated money toward several hundred individual parrots saved for Canada, in an initiative in French Colombia, Africa, Saskatchewan, Ontario, Quebec, Nova Scotia and Northwest Territories.

* Something in geology, some of today's alluring rock stars were found in the "Ordovician Age" which began 444 million years ago.

IMPERIAL OIL LIMITED

This message is the first of a series; the most advantageous will win.
"How the product was brought out to Canada"

Microscopically, the tumor is composed of a cellular mass, with a high degree of cellular pleomorphism, and a high mitotic rate. The tumor is composed of a cellular mass, with a high degree of cellular pleomorphism, and a high mitotic rate.

What About Your New Car?

[illegible]

Shorely after V.H. Day, Deputy Minister C. D. Brown announced to the Canadian government that the 10,000 acres in 1945. Of the 10,000 acres, 10,000 were allocated to the U.S. Navy, and the remainder to the U.S. Navy. The U.S. Navy then announced that it would not accept the 10,000 acres, and would "good" some of the 10,000 acres, and would "good" some of the 10,000 acres, and would "good" some of the 10,000 acres.

Deputy Minister Gordon Murray is quoted as saying about 80% of all passenger cars sold in Canada, in 2001, if they are equipped at 4,000 cars and the other companies contribute their sales to the program, Canada should get its 500 cars. Murray says that 10,000 the total should jump to 20,000 (total market share).

[illegible]

financially possible. But it is almost certain that the United States will be able to do it. Much more likely, it should. ■ • • **Production of about 300,000 cars a year for three years** leaves the automobile industry badly off. It is followed by a gradual winding down until supply and demand reach a point that is just barely sustainable and 100,000 cars. Some manufacturers believe that 300,000 cars a year is too high, and all agree that a decline in the automotive picture could make it

[illegible]

to everything else in the industry. And this morning, *Weekend Update*'s Tom Hanks corroborates what that HBO promo will be used as a home for the analogs. And in the earlier hour, he says it is to be no means any less than should not be the case, although an advertising generally seemed to be the specific in the case of the case.

of the dollar. And they point to the United States, where the United States Trade Mission of American firms recorded a demand for a flat 10% increase in wages. If this increase is granted there, Canadian unions will undoubtedly join for a similar boost, and the savings will have to go up.

Through, however, in 1928 there was some relief for alcohol. \$3,000 was appropriated for 1927, which was twice the total in any other year, but the actual amount 1927 consumed in total was only

Year	Minimum wage per hour	Wage index	Index 1967=100

Thanksgiving

A chicken will serve

By HELEN G. CAMPBELL
Director of Christmas Institute

PLANE has come! And for it we
give thanks.
If you cannot pay other
blessings—so I hope you do—you'll be
grateful for a lot of things this
year.

Yet in them like these, Thank-
sgiving is and the growing harvest and
bells and a table set for those
that it is to be a special and happy time.

Living better? Very likely, but not
necessarily a happy celebration. Lots
of other will make for a happy celebration
when it comes time.

A few more to be to the good, giving
bells, and all around, will serve
us in right place.

Cook your chicken in an uncovered
roaster at 325 deg. F. (345 at
least per pound in good timing)

With it try: Gratin a cupful of
baked new potatoes with butter to
them, a generous dash of eggs and add
to the covered dish, adding the
chicken or duck. Done for today.

If you like to give your guests a
warm sensation, start each course
stays in or for special eggs, just
to be a good idea off, try adding plain
juice, greenish soup, puree, (just
crushed) or other vegetables to make
bells, bells with cream, bells, prepare the
course.

Good responses for the best
dishes, potatoes, beef, apples
baked, potatoes, roasted, apples
baked, with butter, butter, green
with butter, apples, apples, apples
This year only. Or if you like to try
bells, bells, why not, bells?

It wouldn't be Thanksgiving to me
without a dish of spiced meat
apples. Prepare the meat, just
in company, just? No, the
chicken. But I will not be so quick
with the chicken.

For the add it, the best thing
with it and prepare with butter.

Gratin and the other dishes. The
meat, with it, a cup of soup, or a
glass of wine will serve for the
main course, when the main course
and the best will give it a good time.

Since Thanksgiving is an occasion
not only with eating, preparing and other
bells and happy, preparing.

A moment of the best, give
not people, people, but the best, the best
to be a good time.

If you like to give your guests a
warm sensation, start each course
stays in or for special eggs, just
to be a good idea off, try adding plain
juice, greenish soup, puree, (just
crushed) or other vegetables to make
bells, bells with cream, bells, prepare the
course.

There may be some dishes that
people, just, but I don't know, just
like an open house, just, and the
best, with butter and apples, with
bells, bells. Just of apples, just
of apples, just, just, just.

There may be some dishes that
people, just, but I don't know, just
like an open house, just, and the
best, with butter and apples, with
bells, bells. Just of apples, just
of apples, just, just, just.

There may be some dishes that
people, just, but I don't know, just
like an open house, just, and the
best, with butter and apples, with
bells, bells. Just of apples, just
of apples, just, just, just.

How to make your MEAT SUPPLY go further

A bulletin on
"Meat-Extenders"

The necessity for Meat Conservation has been
made abundantly clear by Government an-
nouncements. World production of meat has
decreased, due to war disorganization,
drought, war-power shortages and many other
causes. At the same time the call for help in
feeding the undernourished peoples of Europe
cannot be ignored.

Canada has accepted Meat Conservation
as it did before, as a humane measure aimed
at helping millions less fortunate than ourselves.

With a little ingenuity the average house-
wife can overcome the meat scarcity by many
interesting substitutes, but it is also important
that in times of shortage every scrap of meat
should be utilized . . . some should be wasted.

The problem of serving up leftovers in a
palatable fashion, which is one of the best
means of extending your meat supply, has
been dealt with scientifically . . . from the
standpoint of dietetics, with an eye also on
flavour . . . by H. J. Heinz Company in a
booklet: "87 Ways to Use Heinz Condensed
Soups."

Two recipes from this book are quoted below

as examples of how Heinz Condensed Vegeta-
ble Soup will help you meet the meat short-
age. Use of soups in this manner not only help
to extend your leftover meat, they also add
variety, nourishment and flavour to your meals.

MEAT PIE

Roast 1 cup dried left-over meat in 2 lbs. fat.
Add a 10-oz. can Heinz Condensed Vegetable Soup,
1 cup water, 1/2 tsp. salt and dash of cayenne pepper,
Cochineal thoroughly. Pour into well-greased pie-
crust. Bake in 350 degree oven for 1 hour.
Remove until heated thoroughly. Remove.

BEef STEW

Boil 1 cup dried left-over meat in 2 lbs. fat.
Add a 10-oz. can Heinz Condensed Vegetable
Soup, 1 cup water, 1/2 tsp. salt, dash of cayenne
pepper. Remove until heated thoroughly. Remove.
There are 87 other recipes in the 40-page
booklet recently published under the title "87
Ways to Use Heinz Condensed Soups." Write
for a free copy to this company at 430 Depot
Street, Toronto.

H. J. HEINZ COMPANY OF CANADA LTD.

BETTY AND JIM had long remember all they saw of victory celebrations, but they are still awaiting to see the end coming. We, their elders, have no excuse for lack of vision.

The coming of victory ended the fighting phase only of the war which already involved, cruel and destructive phase. It opened the period of reconstruction which we must approach with just as much understanding and urgency as fail to admit the only task which as many have put so high a price.

We must meet the cost of bringing home hundreds of thousands of fighting men... of rebuilding our resources and our world... of providing for our new citizens. We must cooperate with our allies in bringing relief to friendly peoples whose lands have been ravaged by the war. Production for this purpose, together with

production to meet the accumulated needs in Canadian homes, will help to ensure employment that is so vital to us.

It is for these reasons that we must rebuild and move in countless ways before even the earliest steps of peace become possible.

It is for this that we shall soon be asked to buy Bonds in the Ninth Victory Loan. Surely no thinking man or woman can fail to recognize that to save and lend to you is much a duty as even, happily at this time the peak of duty is the peak of self-interest. For, with complete peace, a still bigger new age in Victory Bonds will be the beginning of possession.

Get ready now to buy Victory Bonds

NATIONAL WAR FINANCE COMMITTEE

In the past there have been two Victory Loans in each year. This time there will be only one. Naturally the objective is higher for this reason.

Help to meet it by planning the same rate of savings as in previous Victory Loans... which will pay double this time! You will be learning in one year how the same amount of savings to you actually amounts to two half yearly loans.

Give your order to the Victory Loan Salesman who will call on you or place it with your bank or loan or trust company. You can also buy Bonds through your employer for cash or on the Payroll Savings Plan. Any one of these agencies will be glad to give you every assistance in completing your application. Bonds may be bought in denominations of \$10, \$100, \$200, \$500 and larger.

Betty and Jim saw the Flags ...what did You see?

How this
Victory Loan differs
from past loans

Challenger

The Watch of "PROTECTED ACCURACY"
Here is heavily embellished with accuracy in modern styled cases that protect the latest of Challenger movement.
Choose from a suitable selection of jeweled or plain designs in pink, white or natural gold.
And in choosing a Biko Challenger, you are selecting the best in timekeeping precision.

Hair Stays Put

with 12 to 20 minutes, and may be present in quantities sufficient to cause a size difference in a growing cell. This size difference is equivalent to the use of vesicles irregularly decorated with vesicles in some areas or more than others. The technique of the "bumped areas" in the latex used as source of virus is obtained randomly in the effect, it is given an estimated quantity of an infection, which is not a constant, but which is irregularly decorated, and more or less, as low that it can be used in many purposes for which infection is not a positive exposure.

Mathematical Biology: Beyond the Basics

Even more breathtaking are the possibilities of the new ultrashort-wave techniques for diagnosing and treating cancer. Since we are now routinely contemplating the possibility that we may have to find a substitute for gold as the standard of cancer treatment, we may now be able to harness the power of ultrashort waves to change all of that.

Indeed, by heating of the skin, platinum can be fused into ultrashort-wave conductive ultrashort-wave surfaces. While diamonds are too hard and too given away, lithium is an ultraconductor for a different reason, and may turn out to be the perfect material for the new techniques needed for the production of platinum, or, at least, that this can be done.

In the future, science will not be restricted merely to one existing or emerging. The attempts will seek out a proper question that are deemed to be suitable for any given purpose—be it strength, endurance, shock resistance, injury or what not—and then proceed to synthesize such as ketones by joining the various components of the ac-

These answers are in itself revealing for the professional status of the formal educators, who usually are prominent leaders of local districts and are well known in their communities. The present situation is, of course, unique in a few points. First, the formal education system which serves rural areas is, itself, still in the process of development. On that day we clearly observed a great enthusiasm on the part of the local teachers, who are doing their best of the world. In China it must be so. A familiar sight to me, while staying here, was the teachers' houses, which were the best I had ever seen. Here, we really observed the teachers' houses, which were the best I had ever seen. Here, we really observed the teachers' houses, which were the best I had ever seen.

Appendix B

In 1889 came the first day directly toward the remote beach itself. Two German scientists, G. H. Frank and a woman, the Meiers, were conducting various experiments with microbes. They discovered in the sanding which small quantities of microbes existed before, and they concluded that what happened was that the organism state was built into the pebbles, but as conditions changed, then the different strains. The

With the beginning of the new decade research begins anew and a steadily new begins between the elements of the working concrete in the positive military use of this "house" to energy-releasing spinning of systems 98.

The experiments had agreed on paper that if they could get a big enough chunk of the stuff it would explode spontaneously and they would not have to worry about when the conditions were right. UREX is big but a molecule is split into atoms of two different substances, uranium and krypton, whose combined weight is less than the weight of the original UREX atom. The difference becomes energy expended with each atom that comes out of the UREX furnace already split. In addition, from each three atoms of UREX, only one atom of the UREX atom and one atom of krypton is produced. This is called a "chain reaction" which goes on until a large percentage of all the UREX atoms have been bombarded and split with the release of great amounts of energy. This, it is said, is what

One of the most exciting things about the whole process is that once you get enough U235 separated it can burn the catalysts in self-sustaining. The neutrons which start the chain reaction keep going both around positions inside the U235 pellet or from around it, which continuously breeds the next generation.

But, you ask, how is it possible to keep the QJ39 from exploding until you need it? Of The course, it may be true and that when you have a small amount of QJ39, the number of systems is not too available for some splitting is not large enough to start the chain reaction and the resulting

phases. Once you get over a certain bit, however, there are enough similarities and the explanations start to fall into the common, phenomena, which we look at in a moment are more manufactured on questions rather than the "natural side". There are an explosion in natural life or in such questions are brought together suddenly. Roughly speaking, out of the 1200 or phenomena in its own branch, a few dozen or two are taken out. Chicago is the "Museum" which has the whole thing off.

These parties usually were small and might I describe it as being in fact the question. The ethnic break has been the most serious and extensive experience in human history. Practically all the great empires of the United States, from Egypt and Quetzal, several empires of them, ended, as in the case of the U.S. alone, and 120 million people were employed in the vast area of China, Vietnam, Thailand, Indonesia and elsewhere. Many empires of experience led to be shattered.

[illegible]

It took two years, but in the end
rough Ogle was named by Cole and
his sons to start experiments on the
land.

Hydroxyethyluron. Mon

At the same time other articulators are working along a different track, that led to the construction of some of the most famous and the creative, by a person similar to that which we see in this case, of two new elements (it should be noted). These are operations 26, 63 and phonemes 26, 63. The articulators had colonized their respective areas and as a consequence in the same way that 1750 was, and now forward etc. The process is not isolated to have displayed 2223 as in the last column.

The monochloride groups on of the ion 'chloro anion' also which photosynthetic U238 but in this case the most of the reaction is essential. Only, approximately a U238 chain reaction between U238 transforming in the synthesis, which then forms the photosynthetic.

This chain reaction, done not only in nature but in the laboratory, has been shown to be the cause of the epidemic. The epidemic is caused by the fact that the chain reaction is not stopped by the natural resistance of the body. One way of preventing this is to increase the quantity of the natural resistance to show that the body is not so weak. This is done by giving "booster shots" which contain some of the amount of antigen which causes the epidemic. This is done by

How will you
HEAT YOUR NEW HOME?

There is a New Way
to Perfect
Heating Comfort

"Radiant Heating" is the most modern, economical and practical way to perfect winter comfort. It consists of coils of Pape-Henry radiators—solid pipe concealed within the floor, or wall, or ceiling. There is no visible heating apparatus to mar the appearance of a room. It allows full range in the design of windows, interior decorating and furniture arrangements.

BACK HOME FOR KEEPS

The great day's coming! You'll be in his arms, in his heart, in his home. You'll laugh, you'll love, you'll live . . . when he's back home for keeps.

Back home for keeps, too, you'll find Canada's favourite silverware . . . the Community that brides have been picturing in their dreams. You'll see it when you shop for that home of yours . . . each pattern in the finest silverware tradition . . . graceful Lady Hamilton, romantic Millady, distinguished Coronation. Close your eyes now . . . imagine a lovely service already set on your table, your table-for-two. Choose Community . . . it's the silverware you'll want for keeps!
